

AFBF535 Blower (Made in China – No warranty)

Key features:

- Beautiful appearance, with the advantages of lightness and high flexibility.
- Safety cover for motor can prevent sucking any sundries.
- Super fan - turbo – motor can produce strong airflow to improve the work efficiency.
- Polythene outer shell can protect the inner components and make the machine safe and durable.
- High grade material and three-speed selector for BF533 which can make you regulate the airflow optionally
- BF536: Single speed selector and strong plastic outer shell, which can protect the inside components and make the machine safe and durable.
- Strong airflow and little noise make it suitable for hotels, large workshops, warehouses, marketplaces, and the other wet places.

Technical specifications:

Technical features	U.M	Blower
Type	-	BF533
Power	W	850
Voltage	V	220 - 240
Length of cable	m	6m
Weight	kg	15.5kg
Rotate speed	speed	H M L
